MINOR IN SOCIAL ENTREPRENEURSHIP & INNOVATION (SEI)

The Social Entrepreneurship & Innovation (SEI) Minor exposes undergraduate students to an integrated approach for applying entrepreneurial principles, concepts, and tools to the world's biggest social problems. Open to all Notre Dame undergraduates, this customizable minor offers a practical and experiential approach to making the world a better place. Students will strengthen their entrepreneurial mindset as they develop innovative solutions to global issues such as: poverty, clean water, human trafficking, racial and ethnic discrimination, domestic abuse, literacy, health care, and many others.

LOGIC AND STRUCTURE

Our integrated approach includes a logical flow of courses and experiential learning opportunities that expose students to a breadth of topical exploration and depth of subject matter coverage. The minor consists of 15 credit hours, including two foundation courses (6 hours), two elective courses (6 hours), and one capstone course (3 hours). It is designed to be flexible so students can tailor the mix of courses to reflect their interests in particular problem areas, such as poverty alleviation or environmental sustainability.

UNIQUE FEATURES

The SEI minor includes five distinctive features:

- an inter-disciplinary approach
- a global orientation
- a competency-based approach to learning
- a strong emphasis on experiential or hands-on learning
- a flexible structure to accommodate varied student interests

The features are accomplished through an innovative mix of courses and co-curricular or community engagement opportunities. Students can pursue consulting projects, internships, mentorships, field research projects, a study abroad program centering on social entrepreneurship, and the conceptualization and launch of their own social innovations. Students in the minor use these opportunities to build experience portfolios that enhance their attractiveness in the job market.

CAREER OPPORTUNITIES

The experiential and applied nature of the minor helps prepare students for a variety of career paths, including work in a) nonprofit organizations dedicated to addressing social problems; b) companies involved with corporate social responsibility initiatives; c) government organizations responsible for policies and programs serving the disadvantaged or addressing inequities and vexing social needs; and d) consulting firms that assist individuals and organizations dedicated to social change.

ACADEMIC HOME

The SEI minor is jointly housed in the McKenna Center for Human Development & Global Business and the Pulte Institute for Global Development. Both units are part of the Keough School of Global Affairs, where the central focus is on advancing integral human development. The program is co-directed by professors Melissa Paulsen and Michael Morris.
